## **MIFAB MI-HUB NO HUB COUPLINGS FEATURES AND BENEFITS**

### **1) Stainless Steel Shield**

A corrugated stainless steel shield provides a solid surface for the bands to tighten against to ensure a uniform grip around the pipe / fittings.

### **2) Mechanical Interlocking Clamp Design**

A one piece stainless steel screw housing mechanically interlocks the housing to the stainless steel band. This one piece housing eliminates leak paths that can develop with welded or staked clamps.

### **3) Floating Eyelet Design**

The stainless steel clamp bands can move independently from the corrugated stainless steel shield. This independence prevents the shield from crimping during tightening which can lead to leaks.

### **4) 5/16" Hex Head Screw**

The stainless steel 5/16" hex head screw is engineered to accept 60-inch pounds of installation torque to ensure a secure band / shield assembly around the pipe / fittings.

### **5) Formed Gasket Design**

The gasket is designed to form fit around the pipe and the inside of the shield so that when the clamping forces are applied, a superior sealing pressure and holding power is achieved. MIFAB's gaskets are made from a virgin elastomeric compound that meets the requirements of ASTM C564.
