Re: MIFAB H.D.P.E. interceptor products List Price Increase Effective January 1, 2021

Dear Valued Customer,

The new INT-2021 H.D.P.E. interceptor and acid neutralization tank product booklet goes into effect January 1, 2021 and replaces the INT-2020.

The INT-2021 has an approximate 4% List Price increase to offset the recent cost increases that we have experienced for plastic resins that we use to manufacture our HDPE interceptors.

The discount structure off of the INT-2021 List Prices remains the same as the discount structure for the INT-2020:

- 1) Lil Max - .52 multiplier for stocking wholesalers, .65 for non stocking
- 2) Mini-Max - .52 multiplier for stocking wholesalers, .65 for non stocking
- 3) Big Max - .52 multiplier for stocking wholesalers, .65 for non stocking
- 4) SuperMax - .65 multiplier, no stocking program
- 5) Acid neutralization tanks - .65 multiplier, no stocking program

All current quotations for the products in the INT-2020 booklet will be honored until December 31, 2020. Effective January 1, 2021 the new List Prices in the INT-2021 are in effect.

Printed copies of the INT-2021 will be distributed soon and be available for download from the www.mifab.com website.

If you require additional information please contact your MIFAB representative.

Thank you in advance for your continued support and understanding in this matter.

Sincerely,

Michael Whiteside
President
