**SQUARE FLOOR DRAIN FOR
MEMBRANE FLOOR AREAS**

Specification: MIFAB® Series F1100-C-SD lacquered cast iron floor drain with anchor flange, cast iron membrane clamp ring with primary and secondary weepholes for waterproofing membrane, and standard reinforced, ("SD6") square 6" x 6" (152 x 152) (specify material finish) strainer with solid hinged cover and secondary grate. (For non-membrane floors, use MIFAB F1100-SD Series.)

Function: Used in showers, kitchens, restrooms and other membrane finished areas where infrequent drain use is required. The solid cover prevents debris from entering the drain which should be cleaned up before washdown. Square adjustable strainer is used for floors that are finished of material or straight line patterns. Membrane clamp is provided to secure the waterproofing membrane.
