FIXED VERTICAL HUB AND SPIGOT WATER CLOSET CARRIER OFFSET FROM STACK

Specification: MIFAB® Series MC-15-HS single, vertical, fixed, water closet carrier with offset lacquered cast iron fitting, 4" (102) waste, 2" (51) vent connection, lacquered cast iron faceplate, universal floor mounted cast iron foot supports, adjustable 8" tapered thread ABS nipple with integral test cap, neoprene bowl gasket, hardware, threaded rod protectors, polished chrome plated finishing cap nuts and rear anchor tie down support.

Function: Used with water closets that are offset from a common stack by 4" in multi-floor installations where minimum pipe space is required. Typical for off the floor plumbing fixtures that are wall mounted and have no contact with the finished floor. The closet carrier is completely concealed within the wall and supports the load of the fixture through a faceplate and foot support system that is anchored to the floor. Sanitation underneath the fixture is more efficiently and economically maintained when installed off of the floor compared to floor mounted.

Note: 8" (203) minimum space required between front of foot and rear of anchor support.

Note: Foot supports and faceplate are assembled at the factory before shipment in the typical siphon jet water closet configuration and are reversible for the blowout water closet design.

Note: Rear anchor support is included with every Left and Right carrier.

*MC-15 is tested to support a 500 lb. load with the rear anchor support.

Note: 8" tapered thread ABS nipple shipped standard with MC-15 Series carriers. The universal faceplate assembly accepts all nipple variations, rolling thread (-OR), cast iron (-CI) and tapered thread ABS with adjustable horn (-AH).
