

MIFAB MI-XHUB NO HUB COUPLINGS FEATURES AND BENEFITS

1) Red Shield

A distinctive red stainless steel shield easily identifies MIFAB's heavy duty MI-XHUB no hub couplings.

2) Mechanical Interlocking Clamp Design

A one piece stainless steel screw housing mechanically interlocks the housing to the stainless steel band. This one piece housing eliminates leak paths that can develop with welded or staked clamps.

3) Floating Eyelet Design

The stainless steel clamp bands can move independently from the corrugated stainless steel shield. This independence prevents the shield from crimping during tightening which can lead to leaks.

4) 3/8" Hex Head Screw

The stainless steel 3/8" hex head screw is engineered to accept 80-inch pounds of installation torque to ensure a secure band / shield assembly around the pipe / fittings.

5) Formed Gasket Design

The gasket is designed to form fit around the pipe and the inside of the shield so that when the clamping forces are applied, a superior sealing pressure and holding power is achieved. MIFAB's gaskets are made from a virgin elastomeric compound that meets the requirements of ASTM C564.

6) Approvals

MIFAB's MI-XHUB Series of no hub couplings are tested and certified to the following Standards: ASTM C-564, ASTM C1540-2011 and CSA B602-2010 and are also listed with I.A.P.M.O. The MI-XHUB are also tested and certified by Intertek Testing Services to the CAN/ULC S102.2-10 "Smoke Test". The MI-XHUB are tested by I.A.P.M.O. to comply to the FM 1680-1989 Standard (except for markings).

CALIFORNIA PROPOSITION 65 WARNING. This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.
