COMBINED ROOF DRAIN AND SECONDARY OVERFLOW SYSTEM

Specification: MIFAB® Series R1150 combined roof drain and secondary overflow system, consisting of a one piece lacquered cast iron drain body with integral sump receiver, cast iron waterproofing membrane clamp rings with integral gravel stops, one 2 1/2" (64) high integral cast iron overflow standpipe and two self-locking metal dome strainers with a free area of 43 square inches each.

Note: The above Specification is only for the 2", 3" and 4" vertical No Hub outlet product. For all other outlet connection sizes and types, refer to the R1150-SPEC model.

Function: Used in any type of conventional or flat roofs where a safety overflow, which receives water only when the accumulation is greater than the height of the standpipe is required to be located beside a standard roof drain. The standpipe can be adjusted to attain the desired overflow water depth. Dome provides for efficient drainage of rainwater and prevents debris from entering the drain line. Anchor flange and membrane clamp with tongue in groove design provides for secure grip of membrane and roof flashing materials.

MODEL NO.	Outlet Size	Outlet Type	Body Height
R1152	2"	No Hub	3" (76)
R1153	3"	No Hub	3" (76)
R1154	4"	No Hub	3" (76)

Suffix	Description
-6	Vandal proof dome (metal domes only)
-11	Acid resistant epoxy coating
-12	Galvanized metal dome
-12A	Galvanized body and membrane clamp
-13	Galvanized body, membrane clamp and dome
-81	Rough bronze dome
-83	Stainless steel mesh screen over dome

(Standard)	No hub outlet
-BA	Buy America Act compliant product
-G	Stainless steel ballast guards
-M	Metal domes (Standard)
-PA	Pennsylvania Steel Act compliant product
-W-1	Water proofing flange
-XJ	Vertical expansion joint (see R1900)
