LD

LEAK DETECTION SYSTEM

Specification: MIFAB Series LD leak detection system consists of an alarm box that is weatherproof rated NEMA 4/4X, 6' 120VAC power cord, 360 (degree sign) viewable alarm light, 85db @ 10' solid tone alarm, and a silence and test button that is to be mounted to the nearest structure. Also included is a pressure switch that is made from Type 316 stainless steel and is mounted inside of the interceptor for oil and / or grease level detection and is connected to the alarm control box.

Function: The purpose of the leak detection system is to monitor any leaks that may occur through the first wall of a double wall interceptor. The leak detection system can only be used with an interceptor that has a double wall construction. It is typically used in high risk applications where the seal of the interceptor needs to be monitored.
