BARRACUDA

Backflow Preventers designed to withstand the most demanding requirements

Designed for the waterworks, plumbing and irrigation markets.

The **BEECO Barracuda 40** Reduced Pressure Zone Backflow Preventer (FRP) prevents non-health hazard pollutants and hazardous contaminants from entering a potable water supply system when backpressure and/or backsiphonage conditions occur.

The **BEECO Barracuda 20** Double Check Backflow Preventer (FDC) utilizes two independent Dual Action Check modules contained within a single stainless steel valve housing.

Both models are available in 2-1/2" to 8" sizes. All sizes of Barracuda 40 are USC approved and listed with IAPMO. 2-1/2" through 4" sizes of Barracuda 20 are USC approved and listed with IAPMO.
