

MAKE YOUR REPUTATION STAINLESS

You want to leverage the advantages of stainless whether you are a consumer, designer or contractor. The structural integrity and chemical resistance of stainless improves the looks and durability of your building.

MIFAB recognizes that the small details on your project will help you create satisfied clients that keep coming back to you. That is why we charge nothing extra for superior performance of stainless steel to ensure that your reputation is stainless.

MIFAB IS A PRIVATELY HELD MANUFACTURER OF ENGINEERED PLUMBING AND DRAINAGE PRODUCTS.

At MIFAB, quality and value are not empty words in a mission statement, but tangible attributes that can we measure. We are committed to your success and promise to offer a solid return on investment in every experience you have with our people, our company and our products.

ENHANCE CLIENT COMMUNICATION

Revit design software leverages Building Image Modeling (BIM) that enables architects and engineers to design and present their plans to clients more effectively. The design professional can present multi-dimensional view of the project. When changes need to be made, the software efficiently coordinates design changes throughout the plan.

MIFAB is ready to help meet those design challenges. Many of our products are available in preformatted files compatible with Autodesk Revit software.

OUR REPUTATION IS STAINLESS

SPECIFICATION DRAINAGE

MIFAB's Specification Binder and website contains Product Guide Specifications for all of our drainage products including floor, area, and roof drains, trench drains, fixture carriers, sanitary floor and waste drains, backwater valves, wall and ground hydrants, trap seal primers, water hammer arrestors, floor and wall cleanouts and grease, oil, solids and specialty interceptors.

TRENCH DRAINS

Proformer — The MIFAB product is full of functional benefits for easier and time-saving installations. Manufactured from cast iron, polypropylene, fabricated steel and stainless steel for increased durability and aesthetics, we've also incorporated numerous ideas into the design to reduce re-work and decrease service calls after installation.

PIPE SUPPORT

C-PORT is a comprehensive line of rooftop support solutions for pipes, HVAC units, ducts, conduits and more. Made from recycled tires, these economical and environmentally safe supports are an excellent way for specifying engineers to receive LEED points. C-PORT is the ideal solution for long-term durability and support as the rubber construction won't penetrate the roof membrane, dampens vibrations and minimizes wear, extending any roof's life.

NO HUB COUPLINGS

Our complete line of MI-HUB (regular duty) and MI-XHUB (extra heavy duty) No Hub couplings eliminate leak paths that can develop with welded or staked clamps. A corrugated stainless steel shield, one piece mechanically interlocking screw housing, with floating eyelet and formed gasket design provide superior sealing pressure and holding power.

MIFAB's 40,000 sq. ft. Chicago manufacturing facility can manufacture standard and custom fabricated access doors, valve boxes, grease, oil and solids interceptors and stainless steel trench and floor drain products. ■ MIFAB has an iron foundry in Pennsylvania to produce drainage castings and a Chicago based fabrication facility to meet the requirements of the Buy America and PA Steel Act.

TIME IS MONEY

When you are in the heat of battle, the last thing you need are delays and blank stares. Our combination of people and tools get you the answers you need on time. Our Kwik Quote program enables you to rapidly calculate the investment on any product we carry. You can also rely on the expertise of our highly trained customer service staff and a sales team that combines centuries of experience in the industry.

MIFAB respects your time and is positioned to help you increase your productivity.

SPACE IS MONEY

Siphonix technology from MIFAB enables you to increase the return on your investment whether you

are a building owner or contractor. You can save money by using less material while increasing the efficiency of your space utilization.

MIFAB Siphonix roof drains leverage centuries old technology in a modern way to help you differentiate yourself from your competitors.

DELIVERY WHEN YOU NEED IT

Take advantage of our superior distribution strategy when you are confronted with a scheduling challenge. You can get what you need when you need it. Our manufacturer's representative in your area has a full inventory of our standard items and the project management skills to help you coordinate the delivery of any product you need.

BEECO

is the Backflow Engineering and Equipment Company, in business since the 1940's it was one of the first backflow preventer manufacturers in the United States. MIFAB recently completed the acquisition of this venerable brand and is now offering a full range of double check and reduced pressure backflow preventers along with many related products.

ACCESS DOORS

MIFAB boasts the strongest and most durable drywall and fire rated access doors available, with a 14-gauge satin coated steel and a 1/4" turnback that ensures the doors remain flush with their frame when suspended in ceilings.

TRAP SEAL PRIMERS

Providing easy cleaning and repair in the field, along with easy inspection of water delivery, our pressure drop activated and electronic trap seal primers are engineered to ensure maximum life and performance. Our primers also eliminate confusion during field installation by delivering enough water to serve up to ten floor drain traps without adjustment.

INTERCEPTORS

Grease, oil, solids, automatic recovery, specialty and custom fabricated interceptors have removable internal parts, a single bolt design, and deep seal trap that allow for easier maintenance and cleaning. Our "sewer gas stopper" eliminates the possibility of sewer gas entering the trap and kitchen area.
